

CAMPUS CLEANING AND DISINFECTING

Upgrades have been made to the air filtration system throughout the campus. We will have two HEPA air purifiers in each classroom. Our water fountains on campus have been altered to allow for refilling a water bottle only. All drinking fountains have been suspended at this time. Please have your student(s) bring a refillable water bottle to school labeled with their name. Cleaning supplies are available in each classroom. Disinfecting of high touch surfaces will take place throughout the day. The entire campus will undergo enhanced cleaning every night.
